COLOUR THAT MOVES YOU!

2026

Hueforia

Colour Development Team of RTP Company

Welcome to Hueforia, your source for beautifully coloured thermoplastics!

At Hueforia, we offer a wide range of thermoplastic colour options, including standard and custom colours, universal masterbatches, specialty performance additives, and special effect compounds. We can assist you with colour and material selection, and then produce a thermoplastic compound to your exact product specifications. With over 40 years of experience, you can rely on the Hueforia team for all your coloured thermoplastic needs.

To assist you in finding the perfect colour for your product, we've curated four colour collections based on trending research for 2026, inspired by a love of literature. From the classic hues of Mystery to the fresh tones of Sci-Fi, the bright shades of Fantasy to the soft, sophisticated Romance palette... together, we'll find the perfectly coloured thermoplastic for your product.

Cloak
S-809925 MB 2% | Polypropylene (PP)

Mystery Collection

The intriguing shades of the Mystery Collection evoke a sense of curiosity and raw strength, making these hues ideally suited for automotive and recreational vehicle interiors.

Sci-Fi Collection

A futuristic astronaut in a space station window looking at Earth. The astronaut is wearing a dark, high-tech spacesuit with a helmet that has a glowing visor. The space station's interior is visible, with a large, multi-paned window that looks out onto the Earth from space. The Earth is shown as a blue and white planet with a dark horizon. The astronaut's face is partially visible through the helmet's visor, which has a small, glowing light. The overall scene is set against a dark, starry background, suggesting a deep space environment. The astronaut is looking out of a large, multi-paned window that provides a view of the Earth from space. The window is framed by a complex, futuristic structure. The astronaut's suit is detailed with various panels, buttons, and a small light on the shoulder. The helmet is sleek and modern, with a clear visor that reflects some of the station's interior lights. The Earth is seen from a high angle, showing the curvature of the planet and the thin layer of atmosphere. The colors are a mix of dark blues, greys, and the vibrant blues and whites of the Earth. The lighting is dramatic, with strong highlights and deep shadows, creating a sense of depth and immersion.

Inspired by the wonders of space and technology, the Sci-Fi Collection provides a spectrum of neutral colours for electronics, medical device housings, and wearables.
